## Request Access

- Click on the **Request Access** link on the home page. You will receive an email confirmation with a link to activate your account.
- **Forgotten password:** Click on the "forgot password" link. Enter your email address or ATTUID and hit submit. You will be sent an email with instructions for resetting your password.

## Compare Mobile Devices

- **Browse:** Use the drop-down menu to browse by operating systems.
- **Find devices:** Choose from a wide range of device features and OEMs.
- **Carrier search:** Select carrier to search for mobile devices by carrier

## Download Your Results

- You have the option to Save and print a PDF version of your search results for future reference. The PDF view provides a side-by-side comparison of your results.
- Check the box to the right to **select the devices** you would like to include in your PDF output.
- Choose **Export PDF** to save or print your search results

The image shows two screenshots of the AT&T Device Comparison Tool interface. The top screenshot shows the 'Device Filters' section with a dropdown menu for 'Select Operating System' open, listing options: Android (29), BlackBerry OS (13), Windows Phone (8), and WebOS (2). A green arrow points from the text 'Operating System Search' to this dropdown. The bottom screenshot shows the search results for 'Android (29)', displaying a list of devices with their specifications and a 'Compare' checkbox for each. A green arrow points from the text 'Side-by-side PDF Comparison View' to the 'Export PDF' button. Another green arrow points from the text 'Browse by Carrier & Device Features' to the 'Carrier' filter section on the left.
